Features:

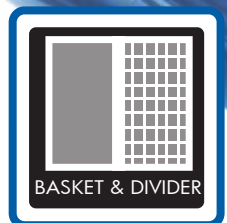

145L Gross/Net Capacity
Large 145L gross/net storage capacity

Wheels for Manoeuvrability
4 Wheels for easy manoeuvrability

Temperature Control
The freezer temperature is easily adjustable

Basket & Divider
Keep parcels and bags of frozen food organised and easy to access

Quick Start Guide

Read the supplied instruction manual before installing the chest freezer. It contains comprehensive installation and usage instructions and important safety advice. This Quick Start Guide only covers basic points.

Installation

- Place the freezer on a sturdy, level floor that is strong enough to support the unit when it is fully loaded. Avoid locations that are close to direct sunlight, sources of heat, extreme cold ambient temperatures and areas of high humidity. Make sure the freezer is positioned level and there is a space of at least 12cm at the back and 5cm at the sides for air circulation.
- Before plugging in the freezer, let it stand upright for at least 4 hours to allow the refrigerant gases to settle. After plugging the appliance into a wall outlet, allow the unit to cool down for 2 to 3 hours before placing food inside.

Temperature control

- The temperature control is located at the front of the freezer in the bottom right corner. It has seven settings, from 1 (cold, the warmest setting) to 7 (the coldest setting), plus a MAX position for fast freezing large amounts of fresh food.
- The first time you turn the unit on, set the temperature control to the MAX position. Then, after 24 hours, adjust the temperature control to the setting that suits your needs, position 5 should be appropriate for normal use.
- To turn the freezer off, turn the temperature control to the minimum position, then unplug the unit from the power supply.

Model Number	STR-H1 45W
Colour	White
Net/Gross Capacity	145L
Warranty	3 Years In Home
Version	QSG-V1.0
