

STIRLING®

82L UPRIGHT FREEZER

Three Transparent Storage Drawers
Reversible Door

Features:

Levelling Feet

Adjustable levelling feet for uneven floor surfaces.

Reversible Door

The freezer door is reversible to enable left or right side opening.

Temperature Control

Freezer temperature is mechanically adjustable.

Three Storage Drawers

For organised storage of frozen goods.

Quick Start Guide

Before installing your upright freezer, read all safety instructions in the supplied manual, especially the sections on electrical safety and installation. This Quick Start Guide only covers basic points.

Installation

- Place the freezer on a sturdy, level floor that is strong enough to support the unit when it is fully loaded. Avoid locations that are close to direct sunlight, sources of heat, extreme cold ambient temperatures and areas of high humidity. Make sure the freezer is positioned level and there is a space of at least 12cm at the back and 5cm at the sides for air circulation.
- Before plugging in the freezer, let it stand upright for at least 4 hours to allow the refrigerant gases to settle. After plugging the appliance into a wall outlet, allow the unit to cool down for 2 to 3 hours before placing food inside.

Temperature control

- The temperature control is located at the front of the freezer cabinet and is accessible when you open the door. It has three settings: MIN (the warmest setting), NORMAL and MAX (the coldest setting). Use a coin or a flat-bladed screwdriver to adjust it.
- The first time you turn the unit on, set the temperature control to the MAX position. Then, after a minimum of 2 hours, adjust the temperature control to the setting that suits your needs, NORMAL should be appropriate for normal use.
- To turn the freezer off, turn the temperature control to MIN, which will stop cooling. Then unplug the unit from the power supply.

Model Number	STR-H82W
Colour	White
Net Capacity	73L
Gross Capacity	82L
Warranty	3 Years
Version	QSG-V1.0
