For automatic start  
or switch-off

**Cools rooms to 25m<sup>2</sup>**  
Suitable for bedrooms, lounge  
or family rooms and small offices

# Quick Start Guide

Read the full instruction manual thoroughly before use. It contains comprehensive installation and usage instructions and important safety advice. This Quick Start Guide only contains brief set-up instructions.

## Window Installation

The air exhaust hose **MUST BE CONNECTED** and hot air expelled to the outside for the appliance to work properly. Keep the hose as short as possible.

Your window kit has been designed to fit most standard 'horizontal' and 'vertical' window applications, but for certain types of windows it may be necessary for you to improvise/modify some aspects of the installation procedure.

### Step 1

Fit the hose connectors to the exhaust outlet grille and onto one end of the flexible hose and twist into place.

### Step 2

Keep a 30cm space when positioning the appliance.

### Step 3

Adjust the window slider to the length of a horizontally or to the height of a vertically opening window and fit the connector through the opening to the outside.

Model Number	A007B-12C
Colour	White
Cooling Power	3.4kW (12000 BTU)
Cooling Area	18-25m <sup>2</sup>
Warranty	3 Years
Version	QSGV1.0
