For appropriate steam cleaning
of different surfaces

1800W
CLEANING
POWER

1800W Power

For reliable cleaning performance

3 BAR STEAM
PRESSURE

3 Bar Steam Pressure

For an efficient clean every time

Quick Set-Up:

Filling the water tank

Press the safety locking cap downwards and turn it counterclockwise to open the tank. With the measuring beaker and using the funnel, pour a maximum of 1.6L of water (no additives) into the water tank. Then press the safety locking cap downwards and turn it clockwise to close the tank.

Setting up the steam cleaner:

Connect the flexible hose end of the steam gun to the steam connection until it clicks into place.

Using the steam cleaner:

Plug in the appliance and switch it on: the red operating indicator will light up. When the green steam control light comes on, you can attach the required accessories (see the full manual for instructions how to attach and use them).

To prevent accidental activation of the steam gun, press the steam pressure lock to lock the steam pressure knob, press it again to release the lock for use. Turn the steam regulator to adjust the amount of steam being emitted.

On board storage

To access the accessories that are housed in the accessory compartment, press down the housing release flaps and lift up the top section by the handle.

Model Number	SC-389
Colour	Blue
Power	1800W
Warranty	3 Years
