

STIRLING[®]

REVERSE CYCLE INVERTER SPLIT SYSTEM AIR CONDITIONER

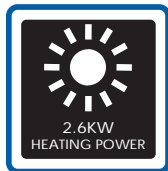

5 Years In Home Warranty
Inverter Technology

Features:

2.3kW Cooling Power
2.3kW Cooling power.
Efficiently cools a room to a comfortable temperature.

2.6kW Heating Power
2.6kW (9000 BTU) Reverse cycle heating power technology for energy efficient room heating.

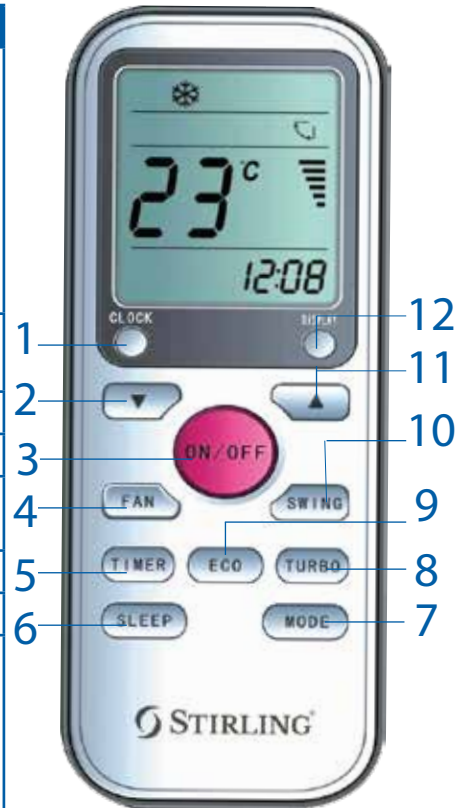

Remote Control
Remote control operation with a backlit LCD and LED display.

Inverter Technology
Inverter technology for energy efficient, continuously regulated temperature control.

Remote Control:

No	Button	Function
1	CLOCK	Press this button to set the time. When the time is flashing, press ▲ or ▼ to adjust the time. Every press equals one minute, or press and hold for rapid adjustment. Press CLOCK again once the time has been set.
2	▼ DOWN	Decrease the temperature or time by 1 unit.
3	ON/OFF	Switch the unit on and off.
4	FAN	Select the fan speed.
5	TIMER	Set to switch on and off automatically.
6	SLEEP	Activate the sleep function.
7	MODE	Select the mode of operation.
8	SUPER/ TURBO	In cooling mode, produce maximum cooling performance (16°C). In heating mode, produce maximum heating performance (31°C).
9	ECO	In cooling mode, the room temperature will be allowed to rise 2°C above the set temperature before cooling restarts. In heating mode, the temperature will be allowed to fall 2°C below the set temperature before heating restarts.
10	SWING	Activate or deactivate movement of the deflectors.
11	▲ UP	Increase the temperature or time by 1 unit.
12	DISPLAY	Switch on/off the LED display (if present).

Note:

Every time you press a button, the unit confirms with a beep the correct reception of each action.
