**Reversible Door**  
The freezer door is reversible to enable left or right side opening.

**Temperature Control**  
Freezer temperature is mechanically adjustable.

**Four Storage Drawers**  
For organised storage of frozen goods.

# Quick Start Guide

Before installing your upright freezer, read all safety instructions in the supplied manual, especially the sections on electrical safety and installation. This Quick Start Guide only covers basic points.

## Installation

- Place the freezer on a sturdy, level floor that is strong enough to support the unit when it is fully loaded. Avoid locations that are close to direct sunlight, sources of heat, extreme cold ambient temperatures and areas of high humidity. Make sure the freezer is positioned level and there is a space of at least 12cm at the back and sides or air circulation.
- Before plugging in the freezer, let it stand upright for approximately 2 hours to allow the refrigerant gases to settle. After plugging the appliance into a wall outlet, allow the unit to cool down for 2 to 3 hours before placing food inside.

## Temperature control

- The temperature control is located at the back of the freezer in the bottom corner. It can be set from position "1" (warmest) to "7" (coldest).
- The first time you turn the unit on, set the temperature control to the maximum position, using a flathead screwdriver. Then, after 24 hours, adjust the temperature control to the setting that suits your needs, between 5 and 6 should be appropriate for standard use.
- To turn the freezer off, turn the temperature control to MIN, which will stop the cooling cycle. Then unplug the unit from the power supply.

Model Number	TF-10QA
Colour	Silver
Net Capacity	80L
Gross Capacity	81L
Warranty	3 Year
