

STIRLING®

215L STAINLESS STEEL TOP MOUNT REFRIGERATOR

Frost-Free

65L Freezer Compartment

Features:

215L Capacity

Spacious compartments with a 150L gross storage capacity fridge and 65L gross freezer capacity provide ample storage space for fresh and frozen food.

Frost-Free

A frost-free cooling system prevents the build-up of ice so you do not need to defrost the appliance manually.

Full-Size Vegetable Crisper

A full-size crisper drawer with humidity control provides perfect storage conditions for fruit and vegetables.

Ice Cube Maker

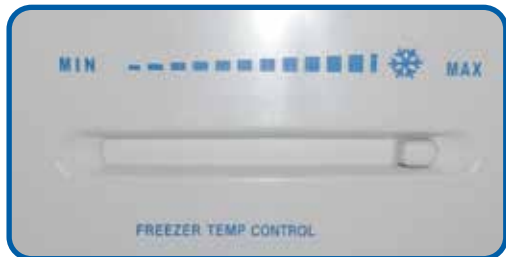

The freezer compartment has a twist double tray ice cube maker for easy production and release of ice cubes.

Quick Start Guide

Read the full manual for comprehensive instructions and important safety advice. This Quick Start Guide only contains brief operating instructions.

Temperature Regulation

This refrigerator has two separate temperature controls, one in the freezer and one in the fridge compartment, so you can adjust the temperature in each compartment separately according to the food stored.

Freezer compartment

To adjust the temperature in the freezer compartment, slide the freezer temperature control to the left (towards "MAX") to lower the temperature and to the right ("MIN") to increase the temperature.

A middle setting should be appropriate for normal usage.

Fridge compartment

To adjust the temperature in the fridge compartment, turn the refrigerator temperature control dial clockwise towards "MIN" to lower the temperature and anticlockwise towards "MAX" to increase the temperature. A middle setting should be appropriate for normal usage.

Ice-making

For ice-making, or after you have added larger quantities of unfrozen food, set the control temporarily to "MAX" for fast freezing.

Model Number	STR-190SS
Colour	Stainless Steel
Net Capacity	190L
Gross Capacity	215L
Warranty	3 Years In Home
Version	QSG-V1.1
