

STIRLING[®]

GAS COOKTOP

Features:

4 Gas Burners

4 Gas powered burners consisting of 1 large rapid burner, 2 medium burners and 1 auxiliary burner

Versatile Cooktop Layout

Cook a variety of dishes on this 58cm cooktop

Flame Failure Safety Device

Each burner is fitted with protective flame failure safety device. Gas is automatically cut off if the flame extinguishes

Easy Clean Surface

The stainless steel surface, lift off controls and enamelled trivets make it easy to clean up

Quick Start Guide

IMPORTANT: This gas cooktop must be professionally installed by a licensed gasfitter/plumber. See the full instruction manual for comprehensive installation and usage instructions and important safety advice.

Using the cooktop

Step 1: Use an appropriately sized pan for each burner.

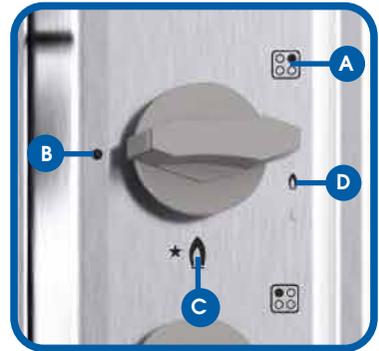

Step 2: The control panel at the right side of the cooktop has four control knobs, one for each burner; the small diagram to the right of each knob illustrates which burner it controls (A). Each control knob has three positions: Closed (B), Maximum aperture (C), and Minimum aperture (D).

Step 3: To light the burner, press down the appropriate control knob gently and turn it anticlockwise to the Maximum aperture position. When the burner lights, keep the knob depressed for approximately 10 seconds to ensure it stays lit when released. Turn the knob to the required position, anywhere between the Maximum and Minimum aperture setting. Do NOT set it between Closed and Maximum. In the event of a burner flame being accidentally extinguished, turn off the burner control and wait for at least one minute before reigniting it.

Step 4: After use, always turn the control knob to the Closed position.

Consult the full instruction manual for comprehensive installation, usage and cleaning instructions and important safety advice.

Appropriate Pan Size	
Burner	Pan Diameter
11.9 MJ/h (3.3 kW/h) Rapid (A)	20–22cm
6.5 MJ/h (1.8 kW/h) Semirapid (B)	16–18cm
