Powerful steam generation
for easy cleaning

500-700W Vacuum Power

Strong suction power
for vacuuming floors

Rotating Floor Brush

Optional brush
action for thorough
carpet cleaning

Quick Start Guide

This Quick Start Guide only contains basic information. Please read the full manual for comprehensive instructions and important safety advice before first use.

Vacuuming

Hard floors: Turn the function selector dial to VAC for vacuuming hard floors such as vinyl, linoleum, floorboards or tiles without brush roll action.

Carpet & rugs: Turn the function selector dial to BRUSH ON for vacuuming carpets and rugs with added brush roll action.

Steam-cleaning

Filling the water tank: Grasp the water tank release lever and pull forward and up to remove the tank. Remove the cap from the bottom of the water tank. Fill with water. Ensure the cap gasket is in place. Reinstall the tank.

Attaching the steam mop pad and holder: Place a clean microfibre steam mop pad on the floor, shag pile side down. Place the steam mop pad holder on top and press down firmly so the hook-and-loop fastening mechanisms engage and the pad sticks firmly to the holder. Lower the power head onto the steam mop pad holder and LIGHTLY press it down to snap into place.

Attaching the carpet glider: Place the carpet glider on the floor and lower the assembled steam mop (with the steam mop pad and holder attached) onto the glider, sliding the front of the power head under the lip until the latches at the back hold it securely in place.

Steam-cleaning: Plug in the appliance, turn the function selector dial to STEAM, then turn the steam level adjustment dial to the appropriate position for the floor you want to clean: HARDWOOD (Low), LINOLEUM (Low to Medium), or TILE/STONE (Medium to High). When the STEAM READY light comes on, press and hold the steam trigger (inside the handle) to begin steam-cleaning; release the trigger when you want to stop the steam.

Model Number	SVS-268
Vacuum Power	500-700W
Steam Power	1400-1600W
Warranty	3 Year
Version	QSG-V1.0
