## 2000W BAGLESS VACUUM CLEANER

3.5L Bagless Dust Tank  
Washable HEPA Filter

### Features:

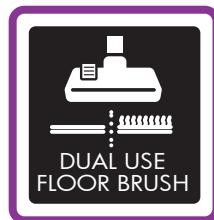

#### **2000W Max. Power**

For reliable  
cleaning performance

#### **3.5L Bagless Dust Tank**

Large dust tank for  
more time vacuuming with  
fewer trips to the bin

#### **Dual Use Floor Brush**

With rocker switch for quick  
adjustment for hard floor or  
carpet cleaning

#### **HEPA Filter**

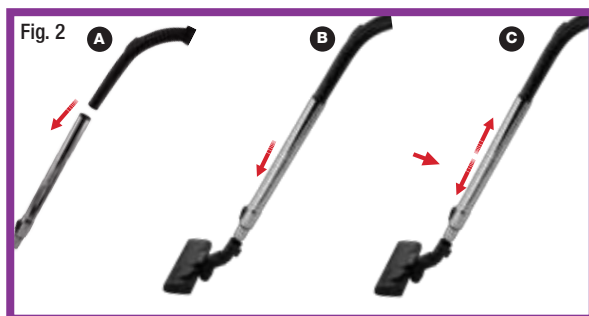

Removable/washable  
HEPA filter ensures thorough  
dust and dirt removal  
from your home

# Quick Start Guide

This Quick Start Guide only contains basic information. Please read the full manual for comprehensive instructions and important safety advice before first use.

## Assembly

- Insert the flexible hose into the hose socket at the front until it locks into position (Fig.1).
- Push the telescopic extension tube onto the curved end of the handle (Fig. 2, A).
- Fit the cleaning accessory tightly onto the end of the extension tube (Fig. 2, B).
- To adjust the telescopic tube length, push in the button at the centre joint and slide the tube apart or together (Fig. 2, C).

## Vacuuming

- Pull out a sufficient length of cord, plug in the power plug (Fig. 3, G) and press down the ON/OFF pedal (Fig. 3, A) to switch the vacuum cleaner on.
- Press the rocker switch on top of the floor brush to extend the bristles and the rubber flap for vacuuming hard surfaces; press the switch again to vacuum carpets.
- Slide the speed control knob (Fig. 3, C) up or down to adjust the suction power to a level appropriate for the surface to be vacuumed. To lower the suction power temporarily during vacuuming, you can also push down the suction control valve on the curved handle (Fig. 4). Push it up again to cover the opening for increased suction.
- When you have finished vacuuming, press down the ON/OFF pedal (Fig. 3, A) to switch the vacuum cleaner off. Press the cord retraction pedal (Fig. 3, F) to rewind the power cord and guide the cord gently back into the housing. Use the handle on top of the unit (Fig. 3, B) for carrying the unit. Do not carry the vacuum by the dust tank handle (Fig. 3, E) to avoid accidentally pressing the dust tank release button (Fig. 3, D) and dropping the appliance.

Model Number	VC-001
Power	2000W
Dust Capacity	3.5L
Warranty	1 Year
Version	QSG-V1.0
