# Quick Start Guide

Read the full instruction manual thoroughly before use. It contains comprehensive usage instructions and important safety advice. This Quick Start Guide only contains a description of some of the most important remote control buttons and functions.

## Remote Control: Outside Buttons

**ON/OFF:** Press this button to start or stop the unit (this will clear any previously set functions).

**SPEED:** Press this button to select the speed: Low, Mid, High, Auto.

**▲▼:** Press these buttons to increase/decrease the setting temperature by 0.5°C. Press and hold the button to go quickly through the temperature range.

**COOL:** Press this button to select COOL mode.

**HEAT:** Press this button to select HEAT mode.

**SWING UP/DOWN LEFT/RIGHT:** Press this button to activate the up/down (left/right) swing function, press it again to fix the position of the louvres. (The up/down (left/right) setting is only valid in this mode, it will not affect the louvre position in other modes. The up/down (left/right) swing has a memory function, it will keep the primary setting in memory when switched off for the next time the unit is switched on or selected from other modes.)

When you open the cover of the remote control, you can access further functions with the buttons on the inside of the unit. Additional functions include MODE, TURBO, SILENCE, TIMER, SLEEP, iFEEL, DISPLAY, iCLEAN, ANTI-FUNGUS, SPOT SWING and ECO. See the Instruction Manual for details.

Model Number	STR-SSAC12000
Cooling Power	3.4kW
