Quick Start Guide

Read the supplied instruction manual before installing the bar fridge. It contains comprehensive installation and usage instructions and important safety advice. This Quick Start Guide only covers basic points.

- This appliance is designed to be freestanding only and should not be recessed or built in.
- Place the bar fridge on a sturdy, level floor, leaving at least 5cm space at the back and sides for air circulation.
- Adjust the levelling legs at the bottom of the unit, if required.
- Before plugging in your new bar fridge, let it stand upright for approximately 12 hours.
- Plug the unit in and allow it cool down for 2 to 3 hours before placing food inside.

Temperature control

The temperature control is located on the upper right hand side of the refrigerator compartment.

The higher the number, the colder the temperature in the cabinet. A mid setting should be appropriate for normal usage conditions.

Food storage

- The shelves, crisper drawer and door racks are suitable for short-term storage of fresh food.

WARNING

Do not remove any foam insulation surrounding the pipes at the back of the unit.
